CAREER SUMMARY:

Impact-driven technologist and aspiring entrepreneur committed to using technology and innovation to create meaningful societal change. My goal is to build and contribute to solutions—whether within an organization or through my own ventures—that improve lives, strengthen communities, and give back to society through responsible, purpose-led innovation.

WORK EXPERIENCE:

- Founder & CEO | Tirth Sutra -July 2025
Founded a dharma-centered digital platform connecting temples and devotees through live darshan, verified spiritual content, and standardized temple governance. Leading product development, partnerships, and nationwide expansion.
- Product Manager & Tech Assistant (Part-Time) RentZoo Technologies Pvt. Ltd. | Jul 2025 – Present
Assisting in product development, technical coordination, and feature execution to improve platform performance and user experience.
- Campus Ambassador Intern – E-Cell, IIT Bombay June 2025 – Jan 2026
Completed a 6-month Campus Ambassador Internship with E-Cell IIT Bombay, promoting events, creating content, and executing marketing & outreach tasks across multiple initiatives.

ACHIEVEMENTS

- AI/ML for Geodata Analysis | IIRS, ISRO
Applied AI/ML techniques to analyze satellite imagery and geospatial data for remote sensing insights.
- Digital Marketing Certification – HubSpot Academy
Gained expertise in SEO, content marketing, email marketing, and social media optimization, with a strong focus on data-driven marketing campaigns and performance analytics.
- Top 40 (out of 190+ teams) – ENIGMA 4.0 Hackathon
Developed Vital Circle, an AI-driven predictive healthcare web platform with risk scoring, doctor-patient portal, and chatbot integration.
- Y Combinator Startup School Graduate – Covered startup ideation, co-founder dynamics, MVP engineering, user acquisition funnels, KPI setting, and fundraising mechanics.
- Round 2 Qualifier – Mumbai Hacks 2025
Selected among 3,500 out of 20,000+ participants. Developed CareScan AI, a multi-agent healthcare platform for AI-based report analysis, symptom matching, specialist recommendation, and smart appointment scheduling.
